Office Action Summary	Application No. 10/816,316	Applicant(s) WALTON, CHARLES A.	
	Examiner Ian J. Lobo	Art Unit 3662	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election without traverse of claims 1-14 in the reply filed on March 23, 2006 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 14, there is no antecedent for "said burrow".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 4, 5, 6 and 10-14 rejected under 35 U.S.C. 102(b) as being anticipated by Meehan ('064).

Per claim 11, Meehan discloses a method for locating hidden animals (mice) in which sensors (1) sense a characteristic (col. 2, lines 49-53) of the animal and report to external equipment (4) the magnitude of the characteristics.

Per claims 12 and 13, see col. 3, lines 11+.

Per claim 14, see step 27 of Fig. 4.

Per claims 1 and 10, see Fig. 1.

Per claim 2, see col. 2, line 51.

Per claim 4, mice read upon the claimed "animals who typically create nests in the ground".

Per claim 5, see recording means (4).

Per claim 6, see claims 3 and 5 of Meehan

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Meehan ('064) in view of Dye ('746) or Jan ('594).

The difference between claim 3 and Meehan is the claim specifies that the probes "are in the form of stakes". Meehan does not disclose that the sensors are "in the form of stakes".

Dye and Jan each disclose rodent or mole chasers that are "in the form of stakes" capable of being driven into the ground. Using such stake-like structures provides greater securing of the sensors to the ground structure. Therefore, in view of

Art Unit: 3662

Dye or Jan, it would be obvious to one of ordinary skill in the art to have modified Meehan to include the sensors in the form of stakes capable of being driven into the ground so as to provide greater securing for the sensor to the ground.

Claim Objections

8. Claim 9 is objected to because of the following informalities: On line 1, after "carries" the word "as" should be deleted. Appropriate correction is required.

Allowable Subject Matter

9. Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ian J. Lobo whose telephone number is (571) 272-6974. The examiner can normally be reached on Monday - Friday, 6:30 - 3:00.
